

## **ERNST – PRESS RELEASE**

**Full-throated rallye sound: the sound of premium quality made by ERNST!**

**Hagen, 15 June 2005 – Full 5-year warranty without mileage restrictions and a Rallye Sound silencer made entirely of high-grade steel: With its new sport silencer range, ERNST sets the tone in the sporty premium segment!**

And what ERNST has to offer really does sound very good. All Rallye Sound silencers are made from very high-grade 1.4301 steel – a material that will make those in the know prick up their ears. The premium principle is uncompromisingly implemented in these silencers too.

Everyone can profit, whether they sell ERNST Rallye Sound silencers, install them, or drive with them. Because best product quality means above all utter reliability and longevity. If used properly, these silencers guarantee five years of driving pleasure, with no mileage restrictions! With premium performance of this kind, the sport silencers are sure to win satisfied regular customers.

The sport range always presents a special challenge to the ERNST engineers, who develop bespoke Rallye Sound concepts for each vehicle type. Much know-how is applied to form the characteristic full-throated rallye sound from an optimised exhaust gas circulation and an adapted silencer volume. Each system is a design in its own right – and mile after mile you can hear all the motor sport experience that has gone into it! This is the only way to win the enthusiasm of demanding customers.

Naturally ERNST offers the premium rallye sound for a great many vehicle types, of course including EC design certification or parts expertise. The striking mirror-finished tailpipes are available in five different variants.

And with that there should be nothing that can stand between the customer and an extraordinary rallye sound experience, because even the fitting is done quickly and easily with the supplied kit.

Rallye Sound made by ERNST – in the sporting segment too, you won't get a more convincing selling point than genuine ERNST premium quality!
